A NOTE FROM OUR BOARD PRESIDENT

It's certainly been an interesting year—full of change across the healthcare landscape and beyond. Some of those changes have moved us forward, while others have added new challenges. One thing that hasn't changed is the need to do more with less. We're constantly working to maintain the high level of patient care we're known for, all while navigating limited resources and rising costs.

The Family Medical Center of Michigan (FMC) is guided by a dedicated volunteer Board of Directors, committed to ensuring we continue delivering high-quality, cost-effective care to all—regardless of the ability to pay. As required by federal statute, over 51% of our Board members are also patients of the health center. That's the foundation of true, patient-driven healthcare.

Like any business, health centers must operate with a positive bottom line. Yes, we watch our budgets carefully—but our focus is always on patients. What do they need? How can we meet those needs in a financially sustainable way? The old saying holds true: No money, no mission. In many rural communities, the health center is the only access point for care—making it a true lifeline. Any change in funding has a direct impact on what services can be offered.

The current Administration's budget proposal includes cuts to Medicaid—the largest payer, not only for FMC, but for community health centers (CHC) across the country. Medicaid covers 50% of our patients, compared to just 18% of the general U.S. population. Even small funding reductions can create major challenges. But it's important to understand—this funding isn't going into a black hole. In 2023, community health centers saved Medicaid an estimated $38.6 billion by keeping patients healthy and out of high-cost care settings. The annual Medicaid savings per patient is; $1,400 for adults, $800 for children, and $3,500 for patients eligible for both Medicare and Medicaid. A 2024 Congressional Budget Office report showed CHCs reduce long-term federal spending by $3.4 billion through lower Medicare and Medicaid costs.

At FMC, we're growing responsibly—carefully evaluating our budgets and resources to ensure our expansion is sustainable. But growth also depends on people. Recruiting and retaining qualified providers—especially in primary care and behavioral health—is becoming more difficult, with limited graduates and increasing demand.

We've joined "grow your own" workforce initiatives, offering paid certification pathways to help fill gaps in key roles. However, new federal loan caps may make it harder for future providers to afford their education. On top of that, many colleges and universities are struggling. Siena Heights, which had a strong behavioral health program, recently announced it will close after the 2025-2026 academic year—another blow to the provider pipeline.

Challenges are part of life. What matters is how we respond to them. At FMC, we stay grounded in our mission—because drifting from that focus leads to missteps. I'm proud to work alongside other Board Members and our CEO, Ed Larkins, who—along with his team—faces these challenges head-on with resolve and clarity.

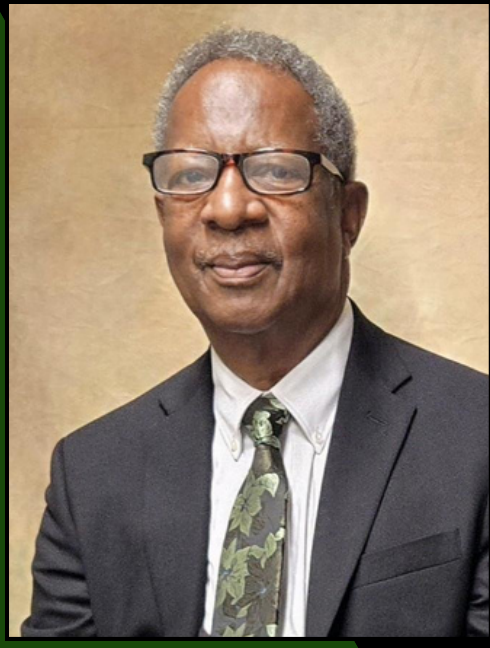

Let me leave you with a few questions:

- Do you live or work in Monroe, Lenawee, or Wayne County?
- Do you have a skill that could benefit FMC and help us serve our communities?
- Are you interested in joining a mission-driven board—or in advocating for community health by reaching out to elected officials, sharing updates, or posting on social media?

If the answer is yes—or if you'd just like to learn more—please reach out.
I'd love to hear from you. Email me at David@DBrownCompany.com

David L. Brown

A NOTE FROM OUR CEO

Looking back on another impactful year, Family Medical Center of Michigan proudly reflects on the progress we've made in serving the people of southeastern Michigan—especially in Monroe County and Lenawee County where our roots remain strong and our commitment to the community continues to grow.

As a Federally Qualified Community Health Center, we are guided by a singular mission: to provide high-quality, comprehensive healthcare to every individual in our community—regardless of their ability to pay. Whether someone is uninsured, underinsured, or facing other life challenges, Family Medical Center is here as a trusted partner in care.

Our wide range of services—including primary care, behavioral health, and dental care—ensures that patients of all ages receive the support they need to live healthy, fulfilling lives. This year, we proudly expanded our care by opening a new optometry clinic in Adrian, Michigan, bringing much-needed vision services to Lenawee County. We also continued to invest in the future by broadening our school-based health programs across Wayne, Monroe, and Lenawee Counties. These efforts bring critical health and behavioral services directly to students, helping to break down barriers to care and create healthier learning environments.

The Family Medical Center is deeply committed to supporting those who are most vulnerable, including individuals struggling with addiction and substance use disorders. Through evidence-based treatments, compassionate counseling, and a holistic approach to recovery, we offer a safe and supportive place for healing and hope.

Our work with seniors is another vital component of our mission. In partnership with organizations like the Monroe Community Opportunity Center and Cities of Refuge Ministries, we address not only seniors' medical needs but also the social determinants of health—such as housing, transportation, nutrition, and social connection—that profoundly impacts well-being. Together, we are helping older adults in our community age with dignity, independence, and support.

None of this would be possible without the dedication of our Board of Directors who are all volunteers, our dedicated staff, the collaboration of our partners, and the trust of the patients we are honored to serve. As we move forward, our promise remains clear: to deliver equitable, quality healthcare to all, and to be a beacon of compassion and excellence in every corner of the communities we serve.

Family Medical Center of Michigan
— Here for everyone. Here for good.

Ed Larkins, CEO

OUR BOARD OF DIRECTORS

Federally Qualified Health Center (FQHC) boards of directors are unique because they are governed by a consumer-majority model, meaning at least 51% of our board members must be patients of Family Medical Center (FMC). This structure ensures our board reflects the needs and perspectives of the communities we serve, fostering accountability and responsiveness. Our board sets FMC apart from other healthcare organizations by directly involving patients in decision-making processes that shape the center's services and priorities.

The board is responsible for providing strategic direction, overseeing financial health, ensuring regulatory compliance, and evaluating the performance of our health center's executive leadership. Board members approve key policies, monitor quality improvement efforts, and help guide FMC's long-term planning. Their role is not operational, but governance-focused, meaning they work collaboratively with FMC's leadership to ensure the organization fulfills its mission and meets our community health needs effectively.

In addition to governance, our board members play a critical role in advocating for policies that support community health and protect FQHC funding and programs. They engage with local, state, and federal legislators, raise awareness about our health center's impact, and help mobilize community support. Their advocacy helps ensure that underserved populations continue to have access to affordable, high-quality care through strong public policy and sustained funding.

OUR MISSION

Family Medical Center of Michigan is dedicated to quality and excellence in providing integrated, comprehensive, and cost-effective medical and dental health care to all, regardless of their ability to pay.

OUR VALUES

Excellence is evidenced by:

- **QUALITY**...delivering knowledgeable and capable health care and support services
- **COMPASSION**...taking the time to treat our patients and each other with equality, caring and understanding
- **INTEGRITY**...interacting with our patients and each other in a respectful, sincere, trustworthy manner
- **INNOVATION**...is evidenced by progressive and innovative approaches in the delivery of health care that includes education and prevention
- **EXCELLENCE**...is evidenced by promoting high-quality staff through continuous education and professional development.

OUR HEALTH CENTER HISTORY

Family Medical Center of Michigan (FMC) is a not-for-profit Federally Qualified Health Center (FQHC) with more than 45 years of experience serving Monroe, southwestern Wayne, and southeastern Lenawee Counties.

FMC was established in 1979. It began in a renovated school building and employed one provider, one receptionist, a medical assistant and an executive director. FMC served approximately 620 patients when it opened its doors. For the first 20 years of FMC 's existence, there was one clinical site located in Temperance, Michigan. In 2000 FMC added Carleton as a clinical location and now FMC has a number of clinical and school-based service sites providing primary and specialty care across Lenawee and Monroe counties and providing behavioral health services in Wayne County schools.

FMC has grown to serve over 18,000 patients and generates over 95,000 medical, behavioral health, and dental encounters annually. FMC employs over 160 staff including primary care providers, dentists, OB/GYN providers, behavioral health specialists, and numerous key support staff.

FMC works to provide quality healthcare to its patients and continually evaluates its services to maintain that quality of care. FMC is recognized by the National Committee for Quality Assurance (NCQA) as a patient centered medical home. FMC uses these standards to provide the highest quality of care to our patients.

FQHCs were first established in 1965 to address health disparities, expand access to care and focus on prevention and overall well-being for the underserved. In the United States, there are 1,400 FQHCs and in Michigan, FMC is one of 44 Community Health Centers.

PATIENT SPOTLIGHT:
ROSEMARY - A LIFELONG FMC ADVOCATE

Rosemary's story with the Family Medical Center of Michigan (FMC) is one of long-standing trust, compassionate care, and shared community values. Her relationship with FMC began before our current Adrian clinic was even built at 1200 N. Main Street. Over the years, she has been under the care of our Primary Care Providers, helping her through different stages of her health journey.

When Rosemary faced mobility challenges, her provider at the time, Dr. DeMots, referred her to orthopedics. That referral led to two successful hip replacements that greatly improved her quality of life. Today, she receives her primary care from Dr. Chiu, whose approach she values deeply. "Dr. Chiu is very nice but also firm. He keeps me accountable," she says with appreciation.

As FMC continues to grow and expand services, Rosemary has embraced our "one-stop shop" model for health care. She has visited our new Optometry Department, where she was cared for by Dr. Avery. "Dr. Avery is very nice, and very knowledgeable about eye health, even from a young age," Rosemary noted, expressing her gratitude for having specialized vision care available in the same place she receives her medical care.

Rosemary's care journey has also included visits to our Dental department for regular cleanings and dentures—services that have helped her maintain her overall health, confidence, and well-being.

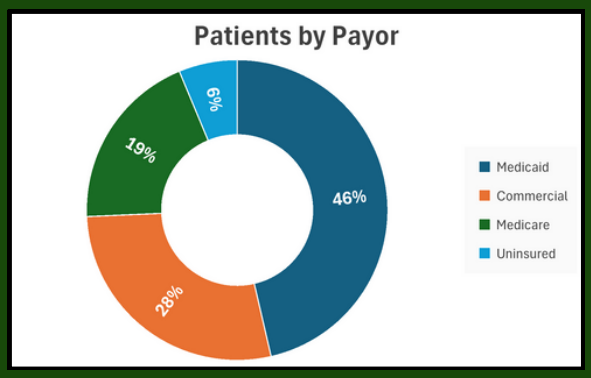

Beyond her own health needs, Rosemary has made an impact on others through her volunteer work with the Meal Assistance of Lenawee (M.A.P.) program. In recognition of her dedication, FMC honored her with a special plaque during Volunteer Appreciation Month. Rosemary is especially appreciative of FMC's ongoing partnership with M.A.P., as the monthly donations we provide help feed community members, including many of our patients.

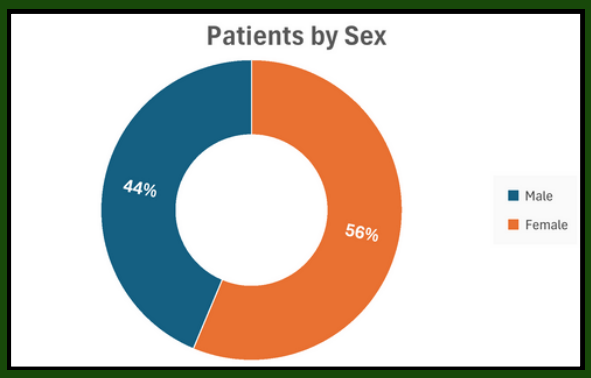

For Rosemary, FMC is more than just a clinic—it's a trusted partner in her health, a supporter of her volunteer work, and a place where her needs are met with respect, compassion, and expertise. "I'm thankful for all the care I've received over the years," she says. "FMC has always been there for me."

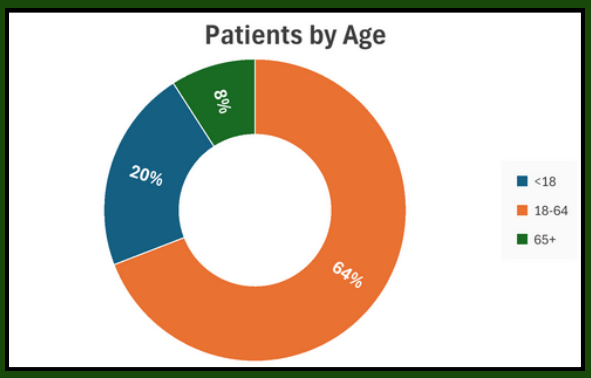

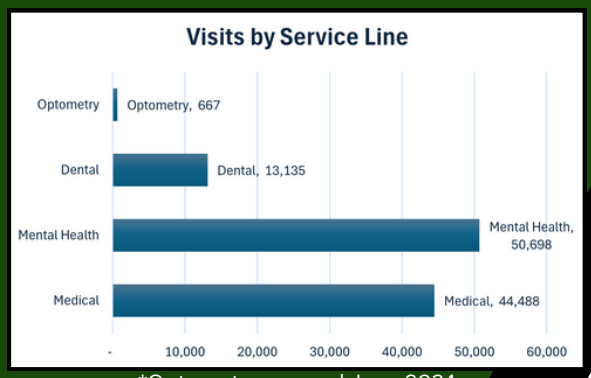

PATIENT DATA AND INVESTMENT STRATEGIES

Family Medical Center is open to all patients. A little more than half are female and the majority, 64%, are ages 18-64 years old. In addition, we serve both pediatric and geriatric patients who are often most vulnerable, especially those with low incomes, many of whom are uninsured or underinsured. Our patients often face barriers to care such as transportation challenges, language differences, or limited access to specialty services. Many live with chronic health conditions like diabetes, high blood pressure, or asthma, and rely on our health center for comprehensive, affordable, and culturally responsive care.

*Optometry opened June 2024

Total Patients in 2024 Per UDS: 18,417

STRATEGIC INVESTMENTS FOR A HEALTHIER FUTURE

In the past year, Family Medical Center strategically invested in expanding services, upgrading facilities, and enhancing patient care programs to better meet community needs. These planned investments position the organization for long-term growth, improved access, and stronger health outcomes for the populations we serve. This approach reflects our commitment to reinvesting resources directly into patient care and community health.

2024 Strategic and Operational Investments

- Contracted with Detroit Public Schools (DPS) to manage 9 Health Hubs within DPS system
- Received $1.5 million from State of Michigan to construct and operate three school-based clinics
- Added Autism Screening Services for Children
- Added Psychiatric Nurse Practitioners
- Expanded use of Medical Van for community outreach
- Opened Optometry Services in Adrian
- Started Pediatric Services in Monroe
- Expanded Medication-Assisted Treatment for Substance Use Disorder patients
- Implemented Behavioral Health/Primary Care Integration model

MEDICAL AND DENTAL SERVICES

ADULT PRIMARY CARE

- Physicals
- Chronic Disease Management
- Preventative Care
- Acute Care

OB/GYN

- Obstetrics
- Prenatal/Postpartum Care
- Gynecology Care
- Family Planning

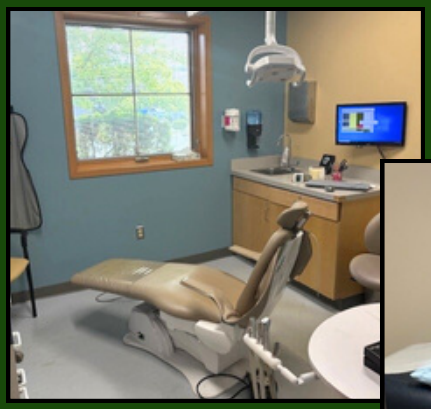

PEDIATRICS

- Well Child
- Immunizations
- Physicals
- Acute and Preventive Care

DENTAL

- Oral Evaluations
- Cleaning, Fillings, Extractions,
- Dentures
- Pediatric Appointments

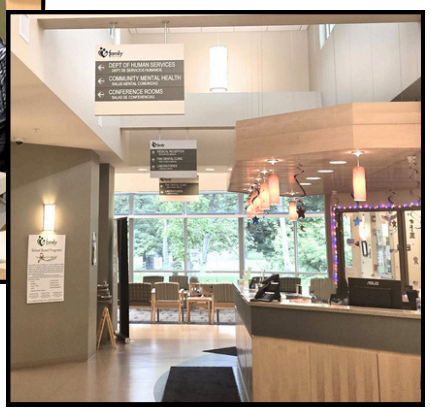

SPECIALTY SERVICES

Family Medical Center offers a number of specialty services to best meet our patient needs. Offering specialty services allows us to provide comprehensive, coordinated care in one location or while supporting patients within their own homes. By expanding access to specialty care services, we can improve health outcomes, reduce delays in care and strengthen our patient trust and retention.

OPTOMETRY

- Comprehensive Eye Exams
- Eye Injury Care
- Diabetic Eye Exams
- Treatment of Eye Diseases
- Pediatric Eye Care
- Eyewear and Contact Lenses

OFFICE-BASED BEHAVIORAL HEALTH

- Adult/Child/Adolescence Counseling
- Psychiatrist/Medication Prescription Services
- Substance Use/ Medication Assisted Treatment Services
- Autism Spectrum Disorder Assessment

PHARMACY

In-house pharmacy services are available in our Adrian and Temperance locations for everyone.

Benefits include:

- 340B Discount & Other Special Discounts
- Prescription Programs to Help Make Medications Affordable
- Immunizations
- Automatic Refills
- Medication Counseling
- Medication Packaging and Med Synchronization
- Curbside Pickup and Delivery

The funds generated from our pharmacy services are reinvested into our communities, allowing us to expand new services to our patients and manage existing services already offered.

OUTREACH AND SUPPORT SERVICES

CHRONIC CARE MANAGEMENT

At Family Medical Center, Chronic Care Management (CCM) is a free service for our Medicare patients living with a chronic health condition such as arthritis, depression, COPD, diabetes, high blood pressure, or vascular disease. This service is designed to help our patients take control of their health with the support of their Primary Care Provider and a dedicated care team who work together to develop and follow a personalized care plan that helps them manage their conditions and achieve their wellness goals.

As part of CCM, patients receive monthly wellness check-ins from a personal care member, 24/7 support via phone, email, or text, and access to a dietician. They are also provided with an in-home health hub tablet, which they can use to connect with their care team, surf the web, or make calls. In addition, they receive a free remote blood pressure monitor or glucometer to help track their vital health data from home.

PAM LAPAN CONCIERGE HEALTH SERVICES

Family Medical Center is proud to offer Pam LaPan Concierge Health Services, a free program for our patients who are 60 or older. This highly personalized service is designed to provide the extra care and attention our patients deserve, helping them stay healthy, connected, and supported. With 24/7 access to their care team by phone, email, or text, they can reach out whenever they need help or have a question —day or night.

Much like our other care management services, patients enrolled in our Concierge program receive a comprehensive annual exam, monthly wellness check-ins from their personal care nurse, and access to a dietician to support their nutrition goals. They may also be eligible for a home health hub tablet and a free remote blood pressure monitor or glucometer to track their health from home. Additional support includes in-home care services, transportation assistance, and food delivery, all designed to make their health care more convenient, coordinated, and compassionate.

Affordable Healthcare for All

Family Medical Center offers a sliding fee scale to ensure that cost is never a barrier to care, as required of all Federally Qualified Health Centers. This means patients are charged for services based on their income and family size, making high-quality care affordable for everyone, regardless of their ability to pay. Our staff are trained to assist patients in assessing sliding fee eligibility... just ask!

QUALITY IMPACT ON WOMEN'S HEALTH

BREAST CANCER SCREENING

Promoting breast cancer screening among low-income and uninsured women is a vital aspect of advancing health equity in Michigan. Nationally, just 50% of uninsured women aged 50–74 had a screening mammogram in the past two years—significantly lower than the 72% for women with Medicaid or other public health insurance and 83% of those with private insurance. In Michigan, women who are low-income and uninsured face the greatest risk of delayed detection and poorer outcomes. While approximately 67% of U.S. women aged 40+ received a mammogram in the last two years, rates plummet among those uninsured, underscoring stark disparities.

1,289
Breast Cancer Screenings Completed

Screening cancers at the localized stage—where five-year survival exceeds 99%—is only possible through greater access to routine care. Family Medical Center providers focus on preventive breast cancer screening for their patients to help close health disparities for those they serve and ensure prompt treatment which is only possibly through early detection.

CERVICAL CANCER SCREENING

Access to regular cervical cancer screening is a proven, cost-effective way to prevent cancer and save lives—yet many low-income and uninsured individuals face significant barriers to this essential care. In Michigan, cervical cancer remains a serious threat, particularly among women who are not up to date on their screenings. Women without insurance are more than twice as likely to have never received a Pap test, and those living in poverty are at greater risk for late-stage diagnosis and poorer outcomes. With early detection through routine Pap and HPV testing, cervical cancer is one of the most preventable and treatable cancers, with a five-year survival rate of over 90% when found early. Family Medical Center actively works to close this gap by ensuring affordable screenings, culturally competent outreach, and navigation services that connect patients to timely follow-up care. By focusing on prevention and access, we are advancing health equity and protecting the well-being of some of our most vulnerable community members.

1,781
Cervical Cancer Screenings Completed

QUALITY IMPACT ON HEART HEALTH

86%
of FMC Patients have their blood pressure under control!

CONTROLLING HIGH BLOOD PRESSURE

Controlling high blood pressure is essential to preventing heart disease and stroke in Michigan—yet hypertension remains a widespread and stubbornly inequitable health burden. In 2023, 37.0% of Michigan adults reported being told they had high blood pressure, outpacing the national median of 34.0%. Low-income individuals (<$20,000/year) shoulder a disproportionate share of this burden, with a 49.0% prevalence compared to 29.9% among those earning $75,000 or more. Treatment disparities are equally stark: while 79.9% of insured adults with hypertension take medication, only 23.9% of their uninsured counterparts do. At the county level, Lenawee County reports a 32.4% prevalence with roughly 60% receiving treatment, and Monroe County had a 35% self-reported high blood pressure rate in 2022. These disparities highlight an urgent need for equitable strategies in detection, treatment access, and support for blood pressure management.

At Family Medical Center, we recognize the importance of early detection, consistent management, and patient education in combating this silent but serious condition. Over the past year, our clinical teams have continued to prioritize blood pressure screenings during routine visits and integrated hypertension control into chronic disease management protocols. Through evidence-based treatment plans, lifestyle counseling, and access to affordable medication, we empower our patients to take control of their health. By addressing hypertension proactively, we not only improve individual health outcomes but also reduce the long-term burden on families and the healthcare system. Our commitment to community education, outreach, and patient-centered care ensures that hypertension control remains a cornerstone of our mission to build a healthier future for all.

PHARMACY SUPPORT FOR HEART HEALTH

In-house pharmacies at federally qualified health centers play a key role in improving heart health by making it easier for patients to get the medications they need to manage conditions like high blood pressure and high cholesterol. Having a pharmacy on-site means prescriptions can be filled right after a medical visit, reducing delays and missed doses. Our pharmacists at Family Medical Center can provide one-on-one counseling, help patients understand how to take their medicines correctly, and watch for drug interactions—all of which improve safety and treatment success. By combining convenience, education, and affordable pricing programs like 340B, our in-house pharmacies help our patients stay on track with their care plans, lowering the risk of heart attack, stroke, and other serious complications.

2024 PHARMACY SERVICES

Patients Serviced: 2,383
Prescriptions Filled: 34,737
Prescriptions for Discounted Services: 1,931

SCHOOL-BASED HEALTH SERVICES

Family Medical Center of Michigan (FMC) received a $540,000 grant from the Michigan Department of Health and Human Services to support the creation of three new school-based health centers in Carleton, Adrian, and Hudson. FMC was one of approximately 30 organizations statewide awarded funding. The grant supported a six-month planning and evaluation process, confirming a strong community need for accessible, school-based healthcare. These new centers aim to reduce barriers to care, such as transportation and missed class time, while supporting student health, academic success, and overall well-being.

Each new health center represents a unique collaboration with local school districts. In Carleton, FMC partnered with Airport Community Schools to open a student health center inside Wagar Middle & Junior High School. It offers primary care and behavioral health services to students on-site. In Hudson, the Hudson Community Health Clinic opened at the Southern Michigan Center for Science and Industry in September 2024, expanding an existing behavioral health partnership to now include primary and limited dental care for youth, school staff, and the surrounding community. In Adrian, the Maples Community Health Center at Springbrook Middle School also opened fully in September 2024, offering year-round medical and mental health services for children and adolescents up to age 21.

Guided by community advisory input, each of these centers extends FMC's mission to deliver comprehensive, community-based healthcare and reinforces its longstanding commitment to youth and family health across Monroe and Lenawee counties.

BEHAVIORAL HEALTH: SUPPORTING STUDENTS WHERE THEY LEARN AND GROW

Michigan students are facing a serious youth mental health crisis. In 2020, 13.5% of children ages 3–17 in the state were reported to be struggling with anxiety or depression—higher than the national average and an increase representing about 22,000 more children than merely four years earlier. In Detroit schools specifically, a survey found that 62% of students experienced symptoms of depression, 56% experienced anxiety, and 23% had seriously considered suicide within the past year. Compounding the challenge, Michigan has historically had some of the highest student-to-school-counselor ratios in the nation (625–671 students per counselor), though the addition of over 1,300 mental health professionals statewide in recent years marks important progress.

Providing behavioral health services in schools does more than respond to mental health needs—it keeps students in the classroom where they belong. Children with mental health challenges often struggle with chronic absenteeism, poor academic progress, and greater disciplinary issues. Embedding mental health supports within schools allows for early identification, immediate intervention, and seamless collaboration with families and educators. This integrated approach strengthens emotional well-being, improves attendance, enhances learning outcomes, and supports students holistically—ensuring they thrive both in school and at home.

FMC's school based behavioral health program provides significant and lasting benefits to local school districts and communities. In collaboration with local school districts, FMC places master's level, licensed therapists, directly in schools to provide counseling services throughout the school day, holiday breaks, and throughout the summer. Services are designed to assist students to successfully manage a variety of challenges that impede academic and social progress. Schools do not have the resources to provide the intensity and duration of behavioral health support many of their students need to succeed. FMC fills that gap. The service is of huge benefit to parents as they don't have to take time off from work, pull their child from school, and transport to and from an appointment in the community on a weekly or biweekly basis. Another benefit is their child can be directly referred by the school, or the parent, alleviating the need of finding a provider in the community that may not be able to see them for several weeks or months. Services are only provided via written consent of the parent/guardian. The schools we work with are wonderful partners and the collaboration we share with each of our school partners is critical to helping students succeed.

2024 FMC Data

- **58 Schools**
- **9 School Districts**
- **18 Therapists**
- **9 Support Coordinators**
- **2,306 Unique Students**
- **23,009 Encounters**

COMMUNITY PARTNERSHIPS

FREE FOOD PHARMACIES

Family Medical Center has partnered with City of Refuge Ministries International on its Meal Assistance Program (MAP) in Adrian to help provide food to our Lenawee County Patients. We started our partnership in January 2023, and have since served 3,369 individuals. The MAP program delivered 204,974 lbs. of food to Lenawee County residents in 2024 to help combat hunger which we know can unfavorably affect childhood development, mental health conditions and adverse health outcomes.

There is also a Food Pharmacy each week at our Monroe and Temperance locations thanks to our partnership with Monroe County Opportunity Program (MCOP). This collaboration began in October 2016 and we continue to support our communities together. In the past two years, we have together distributed 431,660 pounds of food to those in need in Monroe county.

TRANSPORTATION SERVICES

Family Medical Center recognizes the challenges faced by many of its patients with social drivers of health, including their ability to safely and efficiently get to and from their medical and dental appointments. Partnering with local transportation services in Monroe and Lenawee Counties has helped ensure our patients are able to receive critical healthcare services despite transportation difficulties.

In Monroe County, we have partnered with Monroe County Opportunity Program (MCOP) to provide free rides to appointments and in Lenawee County, we've partnered with the Lenawee Public Transportation Authority to provide free rides to avoid missing critical medical and dental appointments.
